

CLIMATEWORK MAINE

BUSINESSES TAKING ACTION ON CLIMATE CHANGE

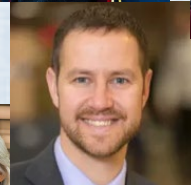

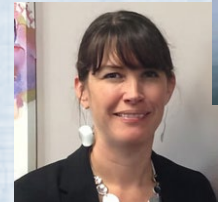

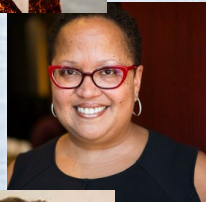

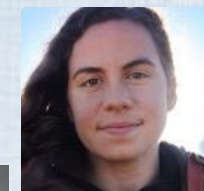

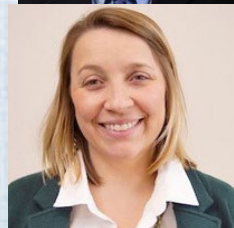

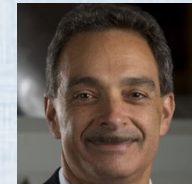

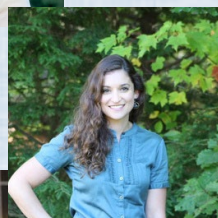

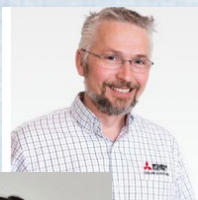

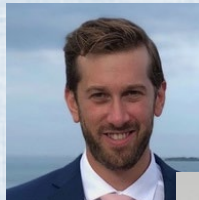

www.ClimateWorkMaine.org

Our Goals

- Accelerating the transition to a new post-carbon economy,
- Engaging with companies on cutting edge ideas and practical steps,
- Strengthening businesses and supporting their employees,
- Working to promote common ground solutions.

Alan Caron

The Founder of **ClimateWork** Maine

Why are we all contributing
our time and energy
to this summit?

And What do We Hope to Achieve?

We're Here Today
Because Climate Change is the
Greatest Challenge of our time.

It is an Environmental Crisis.

ClimateWork Maine

And an Economic One.

It Will Bring the Greatest Changes
To Our Economy
Since the Industrial Revolution.

But for those regions and companies that plan, and adapt, and work together, it will also bring extraordinary opportunities.

Climate Change will require us to
To Think and Act in New Ways

To Focus on Action Rather than Words

Not Just in Faraway Capitals
But in Our Businesses, our Homes and Our
Communities.

There are
147,000
Businesses in Maine

Together, they run and operate:

Thousands of buildings
Hundreds of thousands of vehicles
And use supply networks around the world.

Unless businesses across the state
take action on climate
We cannot meet our goals, as a state.

And our businesses cannot adapt
and thrive in the future.

We are here today
To Learn.

We are here today
To Connect.

ClimateWork Maine

We are here today
To Share.

ClimateWork Maine

We are here today
To Teach.

ClimateWork Maine

We are here today
To Inspire.

We are here today
To Build Understanding.

We are here today
To Build Alliances.

ClimateWork Maine

We are here today
To Help Each Other.

We are here today
To Make New Friends.

are here today
To Build Affection for Each Other.

Even When We Don't Agree.

We are Part of a Growing Movement

For the Things We Love About Maine

We are Part of a Growing Movement
For the People of Maine

We are Part of a Growing Movement
and For the Planet.

But It Is An Important One.

Today is one Small Step Forward.

Many More Will Follow.

The Will Not Always Be Easy or Clear.

But We Must Take Them Together.
